CARBOHYDRATE RESEARCH

Subject index

Acetate esters
Authentic standards for the reductive-cleavage method. The positional isomers of partially methylated and acetylated or benzoylated 1,4-anhydro-D-xylitol 45

N-Acetyl-9-*S*-acetyl-9-thioneuraminic acid
Synthesis of *N*-acetyl-9-*S*-acetyl-9-thioneuraminic acid, *N*-acetyl-9-thioneuraminic acid, and their methyl α-glycosides 303

N-Acetyl-9-thioneuraminic acid
Synthesis of *N*-acetyl-9-*S*-acetyl-9-thioneuraminic acid, *N*-acetyl-9-thioneuraminic acid, and their methyl α-glycosides 303

Acidic glycogen
A novel acidic glycogen extracted from the marine sponge *Aplysina fulva* (Porifera-Demospongiae) 233

Acylated derivatives
Synthesis and characterization of authentic standards for the reductive-cleavage method. The positional isomers of partially methylated and acetylated or benzoylated 1,4-anhydro-L-fucitol 59
Authentic standards for the reductive-cleavage method. The positional isomers of partially methylated and acetylated or benzoylated 1,5-anhydro-D-mannitol 71

Algae
Cell-wall polysaccharides from the marine green alga *Ulva "rigida"* (Ulvales, Chlorophyta). Extraction and chemical composition 251
Cell-wall polysaccharides from the marine green algae *Ulva "rigida"* (Ulvales, Chlorophyta). Chemical structure of ulvan 313

6-*O*-Alkanoylgluconolactones
Regioselective synthesis and characterization of 6-*O*-alkanoylgluconolactones 111

1,4-Anhydro-
Synthesis and characterization of authentic standards for the reductive-cleavage method. The positional isomers of partially methylated and acetylated or benzoylated 1,4-anhydro-L-fucitol 59

1,5-Anhydro-
Authentic standards for the reductive-cleavage method. The positional isomers of partially methylated and acetylated or benzoylated 1,5-anhydro-D-glucitol 85

1,5-Anhydro-D-tagatose
New syntheses of D-tagatose and of 1,5-anhydro-D-tagatose from D-galactose derivatives 197

1,4-Anhydro-D-xylitol
Authentic standards for the reductive-cleavage method. The positional isomers of partially methylated and acetylated or benzoylated 1,4-anhydro-D-xylitol 45

1,6-Anhydro sugar
Synthesis of 4-substituted-2-acetamido-2,4-dideoxy-mannopyranoses using 1,6-anhydro sugar chemistry 29

Antibiotics
Selective methylations of the 2′-hydroxy and C-2 positions of 3-deoxy-5-*O*-(4-deoxymycaminosyl)tylonolide 269

O-Antigen
Synthesis of specifically deoxygenated disaccharide derivatives of the *Shigella dysenteriae* type 1 O-antigen 209

Aplysina fulva
A novel acidic glycogen extracted from the marine sponge *Aplysina fulva* (Porifera-Demospongiae) 233

Aryl β-xylobiosides
Syntheses and testing of substrates and mechanism-based inactivators for xylanases 137

Azido sugar
Synthesis of 4-substituted-2-acetamido-2,4-dideoxy-mannopyranoses using 1,6-anhydro sugar chemistry 29

Benzoate esters
Authentic standards for the reductive-cleavage method. The positional isomers of partially methylated and acetylated or benzoylated 1,4-anhydro-D-xylitol 45
Bifidobacterium longum
Structural studies on a cell wall polysaccharide from *Bifidobacterium longum* YIT4028 245

5a-Carba-trisaccharides
Synthesis of carbocyclic analogues of the mannosyl trisaccharide: ether- and imino-linked methyl 3,6-bis(5a-carba-α-D-mannopyranosyl)-3,6-dideoxy-α-D-mannopyranosides 183
Carbohydrate sulfates
Conformational flexibility in highly sulfated β-D-glucopyranoside derivatives 1
Caryophylli
The relative and absolute configurations of stereocenters in caryophyllose 223
Caryophyllose
The relative and absolute configurations of stereocenters in caryophyllose 223
Cell wall
Structural studies on a cell wall polysaccharide from *Bifidobacterium longum* YIT4028 245
Cell-wall polysaccharides from the marine green alga *Ulva* "*rigida*" (Ulvales, Chlorophyta). Extraction and chemical composition 251
Cell-wall polysaccharides from the marine green algae *Ulva* "*rigida*" (Ulvales, Chlorophyta). Chemical structure of ulvan 313
Chlorophyceae
Cell-wall polysaccharides from the marine green alga *Ulva* "*rigida*" (Ulvales, Chlorophyta). Extraction and chemical composition 251
Cell-wall polysaccharides from the marine green algae *Ulva* "*rigida*" (Ulvales, Chlorophyta). Chemical structure of ulvan 313
Configuration
The relative and absolute configurations of stereocenters in caryophyllose 223
Conformational analysis
Conformational flexibility in highly sulfated β-D-glucopyranoside derivatives 1
Conformational flexibility
Conformational flexibility in highly sulfated β-D-glucopyranoside derivatives 1
Cyanoethylidene condensation
Direct glycosylation of protected *O*-tritylserine esters and oligopeptides 123
Cyclitols
Synthesis of carbocyclic analogues of the mannosyl trisaccharide: ether- and imino-linked methyl 3,6-bis(5a-carba-α-D-mannopyranosyl)-3,6-dideoxy-α-D-mannopyranosides 183

DDQ
A mild and efficient procedure to remove acetal and dithioacetal protecting groups in carbohydrate derivatives using 2,3-dichloro-5,6-dicyano-1,4-benzoquinone 263
Deoxygenated disaccharide derivatives
Synthesis of specifically deoxygenated disaccharide derivatives of the *Shigella dysenteriae* type 1 O-antigen 209
2-Deoxy-2-halo-β-D-xylopyranosides
Syntheses and testing of substrates and mechanism-based inactivators for xylanases 137
2-Deoxy-2-halo-β-xylobiosides
Syntheses and testing of substrates and mechanism-based inactivators for xylanases 137
3-Deoxy-5-*O*-(4-deoxymycaminosyl)tylonolide
Selective methylations of the 2′-hydroxy and C-2 positions of 3-deoxy-5-*O*-(4-deoxymycaminosyl)tylonolide 269
Deoxy sugar
The relative and absolute configurations of stereocenters in caryophyllose 223
2,3-Dichloro-5,6-dicyano-1,4-benzoquinone
A mild and efficient procedure to remove acetal and dithioacetal protecting groups in carbohydrate derivatives using 2,3-dichloro-5,6-dicyano-1,4-benzoquinone 263
2,5-Dioxabicyclo[2.2.2]octane
New syntheses of D-tagatose and of 1,5-anhydro-D-tagatose from D-galactose derivatives 197

Endo-xylanase [β-(1 → 4)-Xylan xylanohydrolase, EC 3.2.1.8]
Syntheses and testing of substrates and mechanism-based inactivators for xylanases 137
Enzymic reactions
Synthesis of *N*-acetyl-9-*S*-acetyl-9-thioneuraminic acid, *N*-acetyl-9-thioneuraminic acid, and their methyl α-glycosides 303
Ester-linked surfactant
Regioselective synthesis and characterization of 6-*O*-alkanoylgluconolactones 111

N-9-Fluorenylmethoxycarbonyl-*O*-tritylserine esters
Direct glycosylation of protected *O*-tritylserine esters and oligopeptides 123
L-Fucitol
Synthesis and characterization of authentic standards for the reductive-cleavage method. The positional isomers of partially methylated and acetylated or benzoylated 1,4-anhydro-L-fucitol 59

β-Glucanase substrates
Synthesis of 4-methylumbelliferyl-β-D-glucan oligosaccharides as specific chromophoric sub-

strates of (1 → 3),(1 → 4)-β-D-glucan 4-glucanohydrolases 285
β-D-Glucan oligosaccharides
Synthesis of 4-methylumbelliferyl-β-D-glucan oligosaccharides as specific chromophoric substrates of (1 → 3),(1 → 4)-β-D-glucan 4-glucanohydrolases 285
D-Glucitol
Authentic standards for the reductive-cleavage method. The positional isomers of partially methylated and acetylated or benzoylated 1,5-anhydro-D-glucitol 85
β-D-Glucopyranosides
Conformational flexibility in highly sulfated β-D-glucopyranoside derivatives 1
Glucuronan
Cell-wall polysaccharides from the marine green alga *Ulva "rigida"* (Ulvales, Chlorophyta). Extraction and chemical composition 251
Glucuronic acids
Conformational flexibility in highly sulfated β-D-glucopyranoside derivatives 1
Glycosidase inhibitors
Syntheses and testing of substrates and mechanism-based inactivators for xylanases 137
Synthesis of carbocyclic analogues of the mannosyl trisaccharide: ether- and imino-linked methyl 3,6-bis(5a-carba-α-D-mannopyranosyl)-3,6-dideoxy-α-D-mannopyranosides 183
Glycosylation
Direct glycosylation of protected *O*-tritylserine esters and oligopeptides 123

Inactivator
Syntheses and testing of substrates and mechanism-based inactivators for xylanases 137
Infrared spectroscopy
Cell-wall polysaccharides from the marine green algae *Ulva "rigida"* (Ulvales, Chlorophyta). Chemical structure of ulvan 313
Inhibitor
Towards the synthesis of sialic acid-based *Salmonella typhimurium* sialidase inhibitors 279

Lipopolysaccharide
The relative and absolute configurations of stereocenters in caryophyllose 223

D-Mannitol, 1,5-anhydro-
Authentic standards for the reductive-cleavage method. The positional isomers of partially methylated and acetylated or benzoylated 1,5-anhydro-D-mannitol 71
Mannopyranose
Synthesis of 4-substituted-2-acetamido-2,4-dideoxy-mannopyranoses using 1,6-anhydro sugar chemistry 29
Methylated and acylated
Authentic standards for the reductive-cleavage method. The positional isomers of partially methylated and acetylated or benzoylated 1,5-anhydro-D-glucitol 85
Methylated derivatives
Synthesis and characterization of authentic standards for the reductive-cleavage method. The positional isomers of partially methylated and acetylated or benzoylated 1,4-anhydro-L-fucitol 59
Authentic standards for the reductive-cleavage method. The positional isomers of partially methylated and acetylated or benzoylated 1,5-anhydro-D-mannitol 71
Methylation analysis
Cell-wall polysaccharides from the marine green algae *Ulva "rigida"* (Ulvales, Chlorophyta). Chemical structure of ulvan 313
4-Methylumbelliferyl glycosides
Synthesis of 4-methylumbelliferyl-β-D-glucan oligosaccharides as specific chromophoric substrates of (1 → 3),(1 → 4)-β-D-glucan 4-glucanohydrolases 285
Mitsunobu reaction
Synthesis of 4-substituted-2-acetamido-2,4-dideoxy-mannopyranoses using 1,6-anhydro sugar chemistry 29
Mitsunobu synthesis
Synthesis of *N*-acetyl-9-*S*-acetyl-9-thioneuraminic acid, *N*-acetyl-9-thioneuraminic acid, and their methyl α-glycosides 303

Neoglycoconjugates
Synthesis of carbocyclic analogues of the mannosyl trisaccharide: ether- and imino-linked methyl 3,6-bis(5a-carba-α-D-mannopyranosyl)-3,6-dideoxy-α-D-mannopyranosides 183
NMR data
Synthesis of 4-methylumbelliferyl-β-D-glucan oligosaccharides as specific chromophoric substrates of (1 → 3),(1 → 4)-β-D-glucan 4-glucanohydrolases 285

Polysaccharide
Structural studies on a cell wall polysaccharide from *Bifidobacterium longum* YIT4028 245

Reductive-cleavage
Synthesis and characterization of authentic standards for the reductive-cleavage method. The positional isomers of partially methylated and acetylated or benzoylated 1,4-anhydro-L-fucitol 59
Authentic standards for the reductive-cleavage method. The positional isomers of partially

methylated and acetylated or benzoylated 1,5-anhydro-D-mannitol 71
Authentic standards for the reductive-cleavage method. The positional isomers of partially methylated and acetylated or benzoylated 1,5-anhydro-D-glucitol 85
Reductive-cleavage method
Authentic standards for the reductive-cleavage method. The positional isomers of partially methylated and acetylated or benzoylated 1,4-anhydro-D-xylitol 45

Salmonella typhimurium
Towards the synthesis of sialic acid-based *Salmonella typhimurium* sialidase inhibitors 279
Selective deprotection
A mild and efficient procedure to remove acetal and dithioacetal protecting groups in carbohydrate derivatives using 2,3-dichloro-5,6-dicyano-1,4-benzoquinone 263
Selective methylations
Selective methylations of the 2′-hydroxy and C-2 positions of 3-deoxy-5-*O*-(4-deoxymycaminosyl)tylonolide 269
Serine glycopeptides
Direct glycosylation of protected *O*-tritylserine esters and oligopeptides 123
Serine glycosides
Direct glycosylation of protected *O*-tritylserine esters and oligopeptides 123
Shigella dysenteriae
Synthesis of specifically deoxygenated disaccharide derivatives of the *Shigella dysenteriae* type 1 O-antigen 209
Sialic acid
Towards the synthesis of sialic acid-based *Salmonella typhimurium* sialidase inhibitors 279
Sialic acid analogs
Synthesis of *N*-acetyl-9-*S*-acetyl-9-thioneuraminic acid, *N*-acetyl-9-thioneuraminic acid, and their methyl α-glycosides 303
Sialidase
Towards the synthesis of sialic acid-based *Salmonella typhimurium* sialidase inhibitors 279
Substrate
Syntheses and testing of substrates and mechanism-based inactivators for xylanases 137
Sugar acetals
A mild and efficient procedure to remove acetal and dithioacetal protecting groups in carbohydrate derivatives using 2,3-dichloro-5,6-dicyano-1,4-benzoquinone 263
Sugar dithioacetals
A mild and efficient procedure to remove acetal and dithioacetal protecting groups in carbohydrate derivatives using 2,3-dichloro-5,6-dicyano-1,4-benzoquinone 263
Synthesis
Synthesis of carbocyclic analogues of the mannosyl trisaccharide: ether- and imino-linked methyl 3,6-bis(5a-carba-α-D-mannopyranosyl)-3,6-dideoxy-α-D-mannopyranosides 183

β-D-Tagatopyranoside
New syntheses of D-tagatose and of 1,5-anhydro-D-tagatose from D-galactose derivatives 197
D-Tagatose
New syntheses of D-tagatose and of 1,5-anhydro-D-tagatose from D-galactose derivatives 197

Ulva
Cell-wall polysaccharides from the marine green alga *Ulva "rigida"* (Ulvales, Chlorophyta). Extraction and chemical composition 251
Cell-wall polysaccharides from the marine green algae *Ulva "rigida"* (Ulvales, Chlorophyta). Chemical structure of ulvan 313
Ulvan
Cell-wall polysaccharides from the marine green alga *Ulva "rigida"* (Ulvales, Chlorophyta). Extraction and chemical composition 251
Cell-wall polysaccharides from the marine green algae *Ulva "rigida"* (Ulvales, Chlorophyta). Chemical structure of ulvan 313

Xyloglucan
Cell-wall polysaccharides from the marine green alga *Ulva "rigida"* (Ulvales, Chlorophyta). Extraction and chemical composition 251
